Further notes from CO: The ship is one away from capacity as of 2-7-26. We had Antigravity, Tate, and Bean added into the roster within the last 24 hrs. The Gullinbursti just had a major remodel and we will be settling in for the next few days just trying to let everyone get used to the new squads. Both squad leaders have some fresh ideas to start team building, and we will be discussing a few ideas for a squad vs squad Competition for March.

Bean is a returning deckhand who wasn't as active, so we will be keeping an eye on him to see if old habits will return.

Piano is going through some personal stuff, so he is getting his hosts in right at two weeks. Have spoken with him and offered any help I can. He seems to be regaining activity.

Deckhand Diary:

Soki and Double A were both deckhanded due to inactivity and failure to sail as well as communicate with their squad leaders. Spookidiggz was deckhanded of her choice. She said she no longer wanted to play. Pizana left the server due to no longer wanting to sail.

Notable things for the month:

LadyHoit has stepped up as the the new FO

Spice has stepped up as the new COS

Shade has stepped up as the new SL for Spice's old squad

Levi is the new XO for Shade squad

NINE has stepped down and moved to Shade Squad as just a host.

Necro has stepped up as the new SL for NINE's old squad

Diggity is the new XO for Necro squad

Piano and Spark were moved to Shade squad with NINE

Bulla was moved to Necro squad to be with others in AEST timezone

Krimson, Wolfee, Rain were moved to Necro squad to even out the host numbers as hopefully Wolfee and Rain will be graduating JLA soon.

Ship chat has been as active as ever and both of the squad chats activity is improving now that some friends have been moved closer together. (322, 69, and 105 messages this week alone)

Ancient Isle Fleet: The fleet CO voyage went well (Even if it was 5 hours long) with LadyHoit as the 4th this voyage.

Media: Since Saber's departure it has been in disarray, but Brightlord is working on getting it back up and running. I have been doing my streaming as usual, and it seems like everyone else is working on their respective projects to the best of their ability, with the state of things.
